MyFloridaCounty.com will be implementing two new fraud prevention services: Address Verification Service (AVS) and Card Verification Value (CVV). AVS will require the person using the service to enter the billing address zip code of the card holder, and CVV will require entry of the three or four digit security code found on the front or back of the card used.

These changes will be implemented in the Official Records Index on April 1, 2010 and in Online Traffic (TCPS) on April 15, 2010.
